

Have you Secured your Workspace Today?

Protect your patients' data by protecting your equipment while at the office and on the road!

Never leave your laptop or equipment unattended.

Did you know? Everyday devices such as laptops, smart phones, and USB/thumb drives are often lost or stolen and could end up in the hands of hackers.

Don't forget to always encrypt sensitive data that is on your devices as a second line of defense if your equipment is lost or stolen

Notify your supervisor and IT security professional if your equipment is stolen so appropriate measures can be taken to safeguard the data on your device

For more tips on the five main cybersecurity threats, check out the HICP publication on the 405(d) [405d.hhs.gov](https://www.hhs.gov/405d)
