

HHS CYBERSECURITY PROGRAM

Office Of Information Security

Cybersecurity is a leading issue within the Healthcare and Public Health (HPH) sector. In order to better prepare for and mitigate cyber-attacks the U.S. Department of Health and Human Services developed two programs, the 405(d) Program and the Health Sector Cybersecurity Coordination Center (HC3), to help engage the public to practice cybersecurity as a shared responsibility and actively participate in creating a more resilient nation.

Contact Us

For more information or if you have any questions please reach out to either program by email, which are listed below:

405(d)

CISA405d@hhs.gov or online at [405d.hhs.gov](https://www.hhs.gov/405d)

HC3

HC3@hhs.gov

405(d)

Aligning Healthcare Industry Security Approaches

405(d) aims to develop consensus-based guidelines, practices, and methodologies to strengthen HPH sector's cybersecurity posture against cyber threats by producing various engagements to share with the sector that promote cyber safety as patient safety.

Resources & Engagements

- 405(d) Post
- 405(d) Spotlight Webinar
- Town Halls
- Cybersecurity Awareness Materials

HC3

Health Sector Cybersecurity Coordination Council

HC3 works to collaborate with the Healthcare and Public Health (HPH) sector by helping to identify, correlate, and communicate cybersecurity information by developing various informational engagements to support cybersecurity programs and mitigate damage from security breaches.

Resources & Engagements

- Sector Alerts
- Monthly Threat Briefings
- White Papers
