

CYBER CRIMINALS ARE USING NEW TECHNIQUES, ARE YOU?

Just as healthcare techniques and technology continuously evolves, cyber criminals are consistently developing new and advanced methods to infiltrate healthcare and public health (HPH) organizations. Don't underestimate a hacker's interest in your network; small, medium and/or large HPH organizations are all at risk. The best way to protect patients and your organization is to stay current and use advanced cybersecurity mitigation techniques.

HHS 405(d)
Aligning Health Care
Industry Security Approaches

To learn more about how you can protect your patients from cyber threats check-out the Health Industry Cybersecurity Practices: Managing Threats and Protecting Patients publication and check out the available resources 405(d) has to offer by visiting our website at [405d.hhs.gov](https://www.hhs.gov/405d) or our social media pages @ask405d on Facebook, Twitter, and Instagram!
